

the revolution in food service...

one table at a time

NEWS

table top dimensions 770 mm x 825 mm

- **connectivity** when regular monoleg tables are joined together to accommodate large parties, the alignment is very often impossible, table tops have steps and/or slightly different inclinations resulting in visually unpleasant and quite uncomfortable junctions. With our *tongue and groove system*, tables can be added in any direction and they remain seamlessly joined.

**Your customers will love it...
You will love it**

- **all weather UV resistant** our table tops can be used *INDOOR & OUTDOOR*.

- **super strong and highly resistant to scratches** the fiber glass filled technopolymer has a natural scratch resistance predisposition paired with strength, impact resistance and rigidity.

- **folding table top & nesting leg** our tables can be stored in very small spaces and tacked away with minimum effort.

- **easy cleaning & maintenance**

Ø600mm or Ø700mm round table tops also available, made of the same strong all weather resistant material.
